Pickup, drop and local transportation throughout your stay.

World-Class  
Healthcare  
in India

Personalised  
Care for a  
Healthier  
Tomorrow

# How the Medical Journey Works

## SIMPLE PROCESS

### From enquiry to safe return

1

#### Medical Enquiry

Patient shares diagnosis, symptoms and available reports.

2

#### Doctor / Hospital Review

Records are coordinated with a suitable specialist or hospital team.

3

#### Pre-Appointment & Estimate

Appointment, proposed plan, expected stay and indicative cost are obtained where available.

4

#### Medical Visa Support

Hospital correspondence and supporting documents are coordinated for patient and attendant.

5

#### Arrival in India

Airport reception, accommodation check-in and hospital transfer are arranged.

6

#### Treatment Support

Transport, interpreter and non-clinical coordination continue during treatment.

7

#### Recovery & Follow-up

Long-stay accommodation, repeat visits, rehabilitation or wellness support can be arranged.

8

#### Departure

Final transfer and travel assistance after medical clearance.

# Pre-Arrival Medical Coordination

## BEFORE THE PATIENT TRAVELS

### Better prepared. Better coordinated.

#### If the illness / diagnosis is already known

The patient can send available medical records before travel. We coordinate these with the relevant hospital or specialist to seek an appointment and, where possible, a preliminary treatment plan and indicative estimate before the patient books travel.

## DOCUMENTS

### What the patient may share

- Medical reports and discharge summaries
- Blood and pathology investigations
- Previous surgery / treatment records
- CT / MRI / X-Ray / ultrasound reports
- Current prescriptions and medication history
- Doctor referral or diagnosis notes

#### Indicative Cost Estimate

Where available, we help obtain an expected treatment range, likely hospital stay and proposed plan. Final medical decisions and final billing depend on in-person examination, investigations, complications, implants, medicines and hospital policy.

# Visa, Language & International Patient Support

## TRAVEL-READY SUPPORT

### Remove practical barriers before treatment

#### MEDICAL VISA SUPPORT

Hospital appointment / invitation coordination, supporting medical correspondence, attendant visa guidance and documentation assistance. Visa approval remains with the competent authorities.

#### INTERPRETER & TRANSLATION

Language support can be arranged based on availability for consultations, investigations, admission, discharge and follow-up. Written translation of key non-clinical information can also be coordinated where required.

#### AIRPORT & LOCAL ASSISTANCE

Airport pickup/drop, hospital transfers, diagnostic-centre visits, pharmacy trips, wheelchair-support coordination and dedicated private transport.

#### PATIENT ATTENDANT SUPPORT

Accommodation, transport and local assistance for accompanying family members or attendants throughout the stay.

# Accommodation for Short & Long Medical Stays

## STAY SOLUTIONS

### Close to care, suited to duration and budget

Treatment may require a few days, several weeks or even months. We arrange accommodation according to the hospital location, patient condition, budget, attendant needs and expected length of stay.

#### HOTELS

Convenient for short stays, consultations, procedures and attendants.

Daily housekeeping | Multiple categories | Meal options

#### GUEST HOUSES

Practical and cost-conscious for medium-term stays near treatment centres.

Flexible duration | Basic services | Hospital access

#### SERVICED APARTMENTS

Recommended for long recovery periods and family stays.

Kitchen | Living area | Laundry | Housekeeping options

#### EXTENDED STAY SUPPORT

For chemotherapy, rehabilitation, transplant follow-up and prolonged recovery.

Stay extension | Repeat transport | Follow-up scheduling

#### Location matters

Whenever practical, we prioritise accommodation with convenient access to the treating hospital to reduce travel time and make follow-up visits easier.

# Medical Specialties We Can Coordinate

## HEALTHCARE NETWORK

### Specialist and hospital coordination based on need

Cardiology & Cardiac Surgery

Orthopaedics & Joint Replacement

Oncology & Cancer Care

Neurology & Neurosurgery

Gastroenterology & Liver Care

Nephrology & Urology

General & Laparoscopic Surgery

Gynaecology & Women's Health

IVF & Fertility Treatment

Dental Care

Cosmetic & Reconstructive Procedures

Ophthalmology / Eye Care

ENT

Rehabilitation & Physiotherapy

Ayurveda & Wellness Programmes

Specific availability and medical suitability are subject to evaluation by the treating hospital / doctor.

## OUR ADVANTAGE

# Why International Patients Choose Adieu Holidays

Healthcare coordination, travel expertise and practical support - organised around the patient's treatment plan.

## ONE POINT OF CONTACT

One team coordinates hospital communication, appointments, transport, accommodation, interpreter support and travel logistics.

01

### CASE-BASED HOSPITAL MATCHING

We coordinate the hospital and specialist according to diagnosis, required treatment and patient preference.

02

### QUALITY-AWARE COORDINATION

Where relevant, hospital selection can consider recognised quality and accreditation information such as NABH/QCI status.

03

### PRE-TRAVEL CLARITY

Available reports are shared before travel to seek appointments, proposed treatment planning and indicative estimates where hospitals provide them.

04

### INTERNATIONAL PATIENT SUPPORT

Medical visa documentation coordination, interpreter assistance and attendant support help reduce practical barriers.

05

### LONG-STAY SOLUTIONS

Hotels, guest houses and serviced apartments can be arranged near the treating hospital for short or extended recovery stays.

06

### DELHI NCR GROUND HANDLING

Airport reception, hospital transfers, diagnostic visits, local transport and follow-up movements are coordinated around the medical schedule.

## PATIENT-FIRST PLANNING

Our coordination approach is informed by current Government of India medical-visa guidance and the Indian healthcare quality framework led by NABH/QCI. Final clinical decisions always remain with the treating doctor and hospital.

## START HERE

# Send Us the Medical Reports

## We coordinate the next steps in India.

For faster pre-arrival coordination, share the patient's available medical information and travel requirements. We will route the case to a suitable hospital / specialist and coordinate the non-clinical journey.

### WHAT TO SHARE WITH US

- 1 **Diagnosis / symptoms and current condition**
- 2 **Medical reports, scans and discharge summaries**
- 3 **Doctor advice or recommended procedure, if known**
- 4 **Nationality and preferred travel period**
- 5 **Preferred language / interpreter requirement**
- 6 **Number of attendants and stay preference**

### WHAT HAPPENS NEXT

#### 01 REPORT REVIEW

We coordinate the case with a suitable hospital / specialist.

#### 02 APPOINTMENT + ESTIMATE

Appointment and indicative treatment estimate are requested where available.

#### 03 VISA DOCUMENT SUPPORT

Hospital letter / correspondence and attendant documentation are coordinated as applicable.

#### 04 TRAVEL + STAY

Airport transfer, accommodation and interpreter support are arranged.

#### 05 CARE + FOLLOW-UP

Local transport, follow-up visits and recovery logistics continue until departure.

### MEDICAL VISA & ATTENDANT SUPPORT

India currently provides e-Medical and e-Medical Attendant visa categories for eligible travellers. Requirements can vary by nationality and case; visa approval is issued only by the competent Indian authorities.

### READY TO BEGIN?

## Share the case. We will coordinate the journey.
